

Procurement and Supply Chain Services

Our Experience Enables Your Success

Leverage our lessons learned from operating global supply chains for 450 of the world's leading brands – without even being a manufacturing customer.

We are a trusted partner acting as an extension of your procurement and supply chain team, delivering:

- Consultative Managed services to free up your internal resources
- Supplier management, leveraging our executive-level relationships
- Market insights and intelligence from deep commodity expertise
- Cost-savings, assurance of supply and on-time delivery based on our spend leverage

Portfolio Includes:

GLOBAL MARKET INTELLIGENCE

Predictive assessments and quantitative insights – a strategic advantage for design and sourcing professionals requiring more than traditional research to guide decision-making in fast-paced markets. Includes current and forecasted supply/lead times, capacity, pricing analysis, trends and market dynamics across a wide range of commodities and categories.

PROCUREMENT AND SUPPLY CHAIN ASSESSMENT

A strategic assessment of your current procurement and supply chain processes compared to best practices with recommendations for cost avoidance, increased flexibility and risk mitigation. Assessment includes demand planning, sourcing and procurement processes, spend and cost analysis, carbon footprint, supply chain network optimization, and more.

PROCUREMENT TECHNOLOGY SERVICES

Procurement technology assessment, implementation and optimization services to increase spend visibility, analytics, and quickly achieve ROI. Jabil handles millions of procurement transactions across the world with technology and know-how that help make your Source-to-Pay processes as fast, efficient, and profitable as possible.

PROCUREMENT MANAGED SERVICES

Our responsive, customer-centric team of procurement professionals will manage your entire procurement spend and processes with tailored, scalable solutions. Let us handle your procurement and supplier management tasks, freeing up your resources, and gaining access to our spend leverage and supplier relationships.

LOGISTICS

A central logistics management team manages the full spectrum of goods flowing through your logistics network. Gain increased visibility with 24/7 access to 360o logistics data, increased automation, and reduced manual data entry and tracking.

SUPPLY CHAIN MANAGED SERVICES

A single partner to manage your end-to-end supply chain activities. Leverage Jabil's technology, infrastructure, and supplier relationships to get the right parts at the right place at the right time. Free up your internal resources and gain cost savings from a consolidated supply chain, inventory optimization and distribution flexibility.
